Introduction

1. Introduction

System Profile

- Project Title → E-Learning System
- Organization → Shree Ramakrishna Institute Of Education and Applied Sciences.
- Front -End tool → PHP(Laravel),CSS,HTML
- Back -End tool → MySQL
- Project Category → Web Application
- Operating System → Windows 8 or above
- Project Duration → 2 Month
- Project Guided By → Mrs.Shweta Shinde
- Developed By → Yesha Kaniyawala

2. System Introduction

2.1 System Definition, Objective and scope

2.1.1 System Information: -

A learning system based on formalised teaching but with the help of electronic resources is known as E-learning. While teaching can be based in or out of the classrooms, the use of computers and the Internet forms the major component of E-learning. E-learning can also be termed as a network enabled transfer of skills and knowledge, and the delivery of education is made to a large number of recipients at the same or different times. Earlier, it was not accepted wholeheartedly as it was assumed that this system lacked the human element required in learning.

2.1.2 PROJECT OBJECTIVE: -

E-Learning Enhance the quality of learning and teaching. Meet the learning style or needs of students. Improve the efficiency and effectiveness. Improve user-accessibility and time flexibility to engage learners in the learning process.

2.1.3 System Scope: -

The following project has much scope both in present as well as future. E-Learning system is based on formal teaching but with the help of electronic resources outside of a traditional classroom.

2.2 Hardware & Software Requirements

Hardware:-

- Processor : 4-bit operating system, x64-based processor
- Ram : 8 GB or above
- Hard-Disk : 8 GB or above

Software:-

- Backend : MySQL.
- Frontend : PHP(Laravel),HTML,CSS.

- Operating System : Windows 8 or above.

3. REQUIREMENT ANALYSIS

3.1 Expected working of System

- **Role of User**

- Register
- Login/Logout
- Edit data
- Add Instructor
- Add Feedback
- View Course
- Forget Password

- **Role of Course**

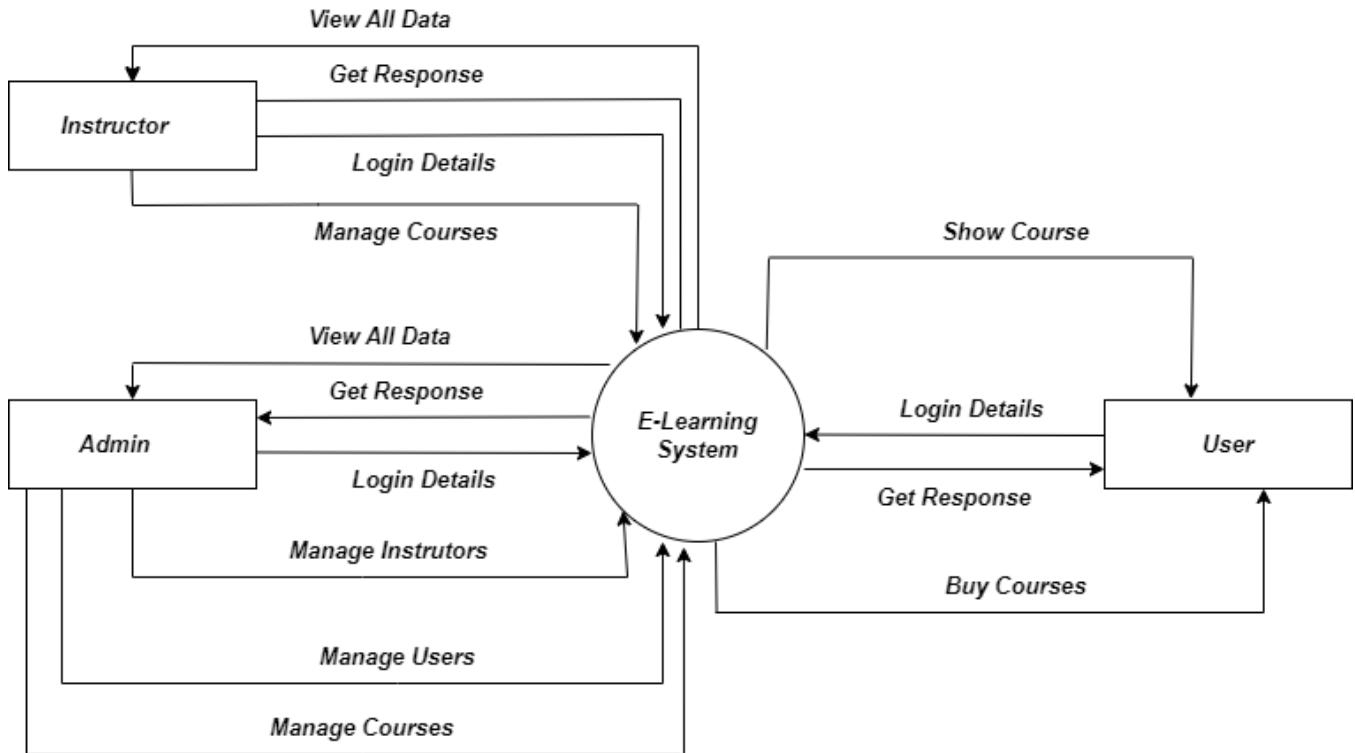

- Add Instructor
- Add Course
- View Course
- Add Feedback
- Forget Password
-

- **Role of Instructor**

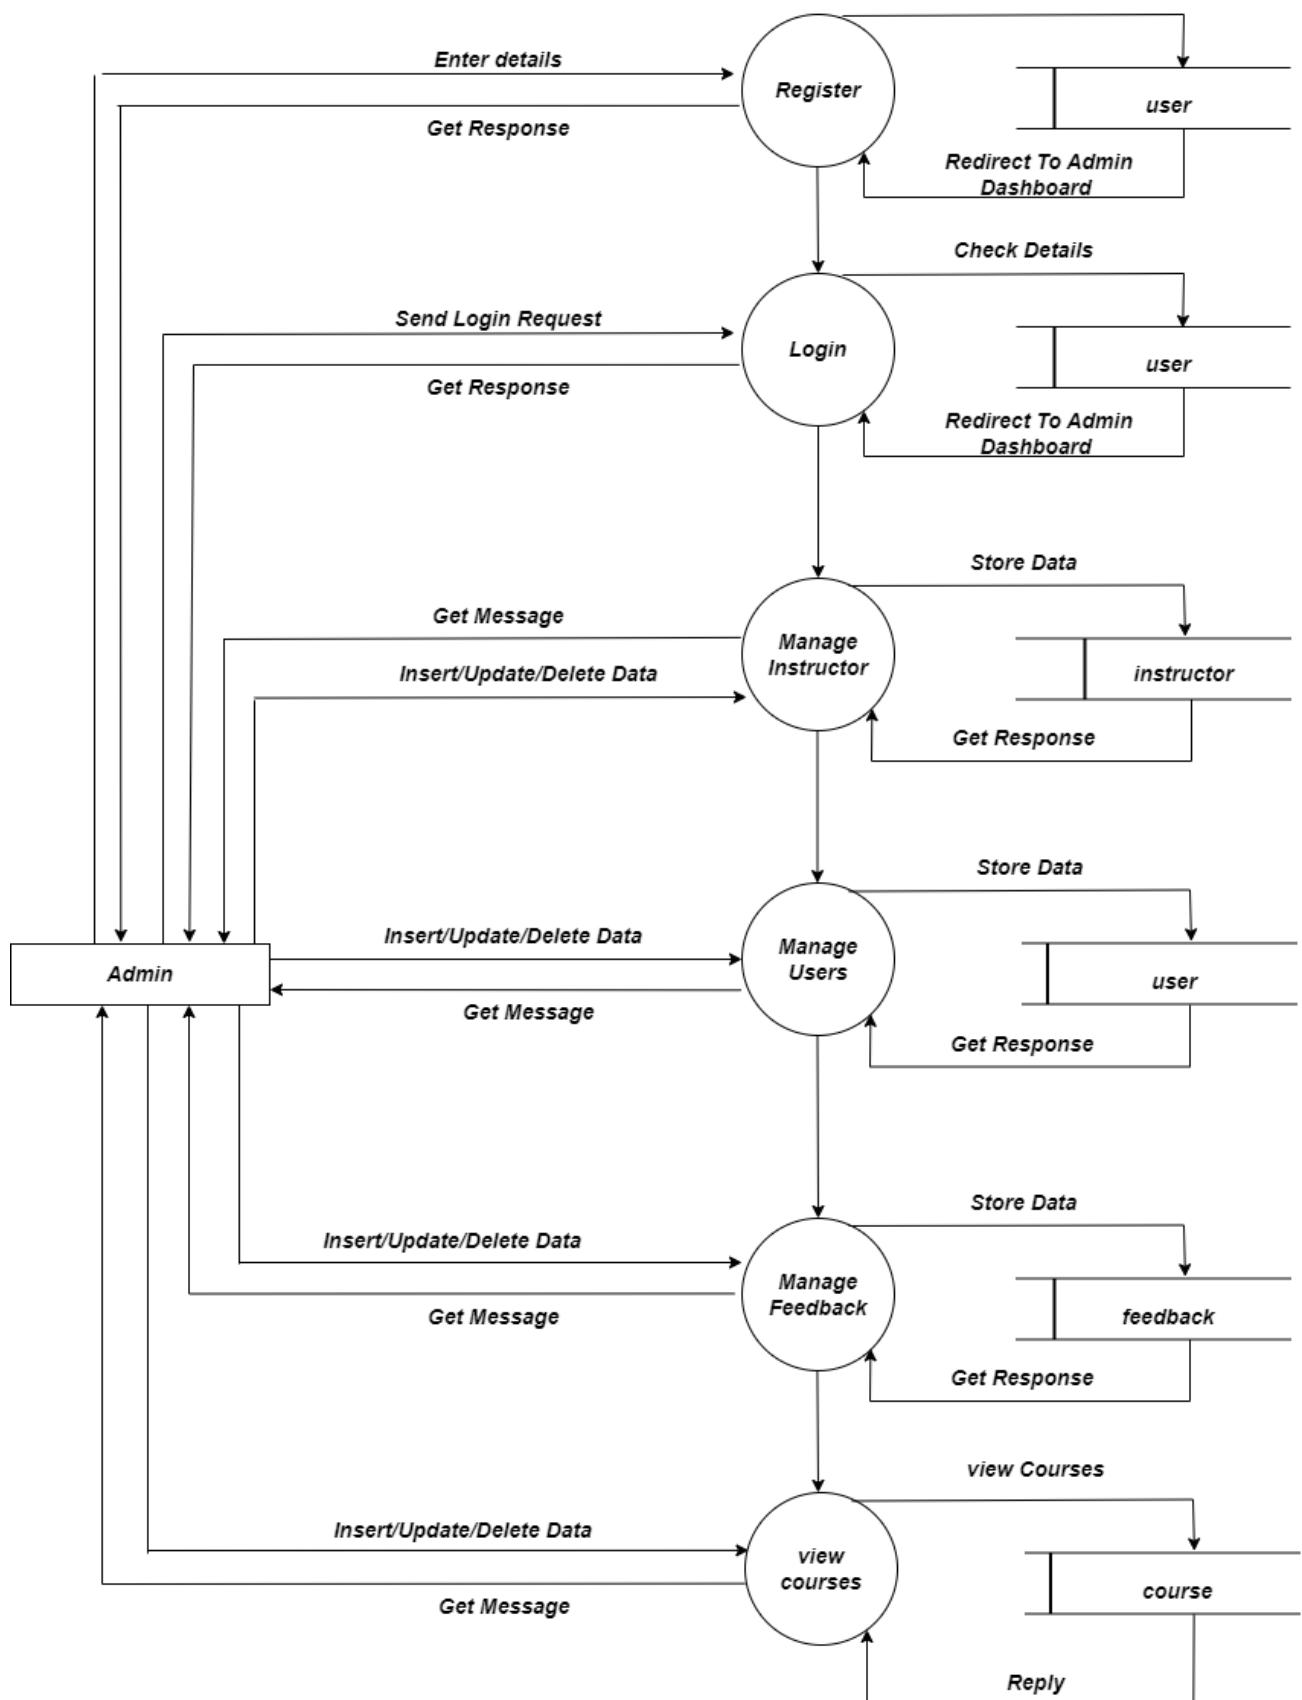

- Add Course
- View Course
- Add Feedback
- Forget Password

3.2 Data Flow Diagrams (DFD)

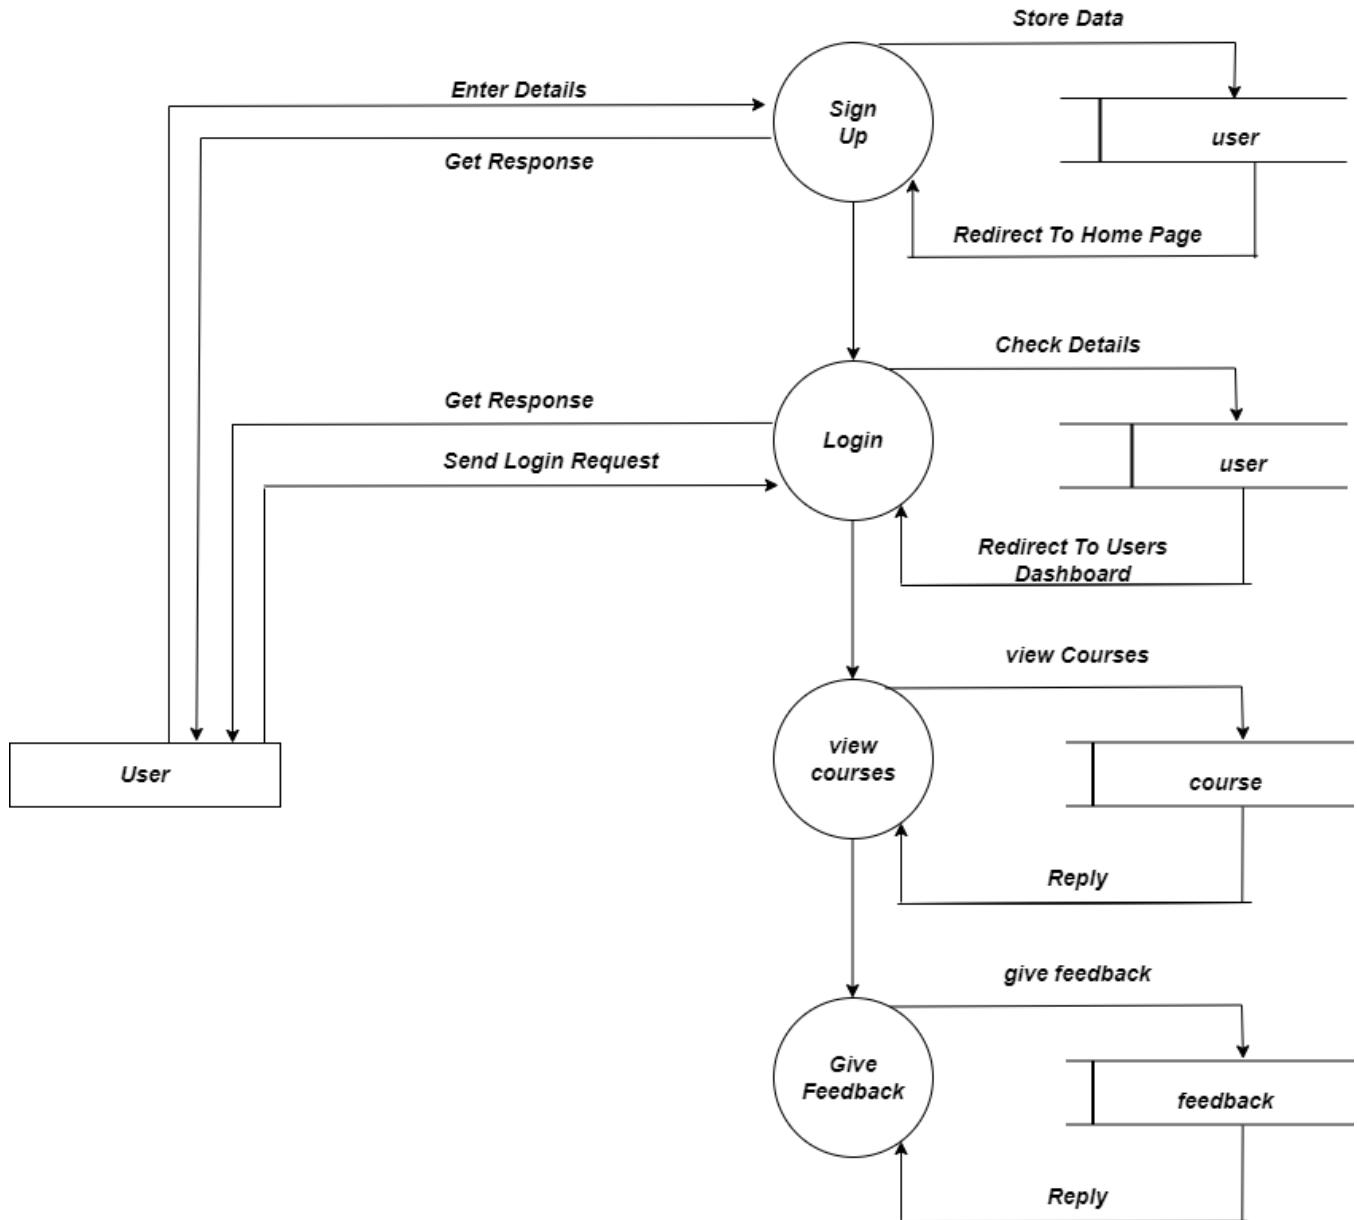

- **CONTEXT LEVEL DFD:-**

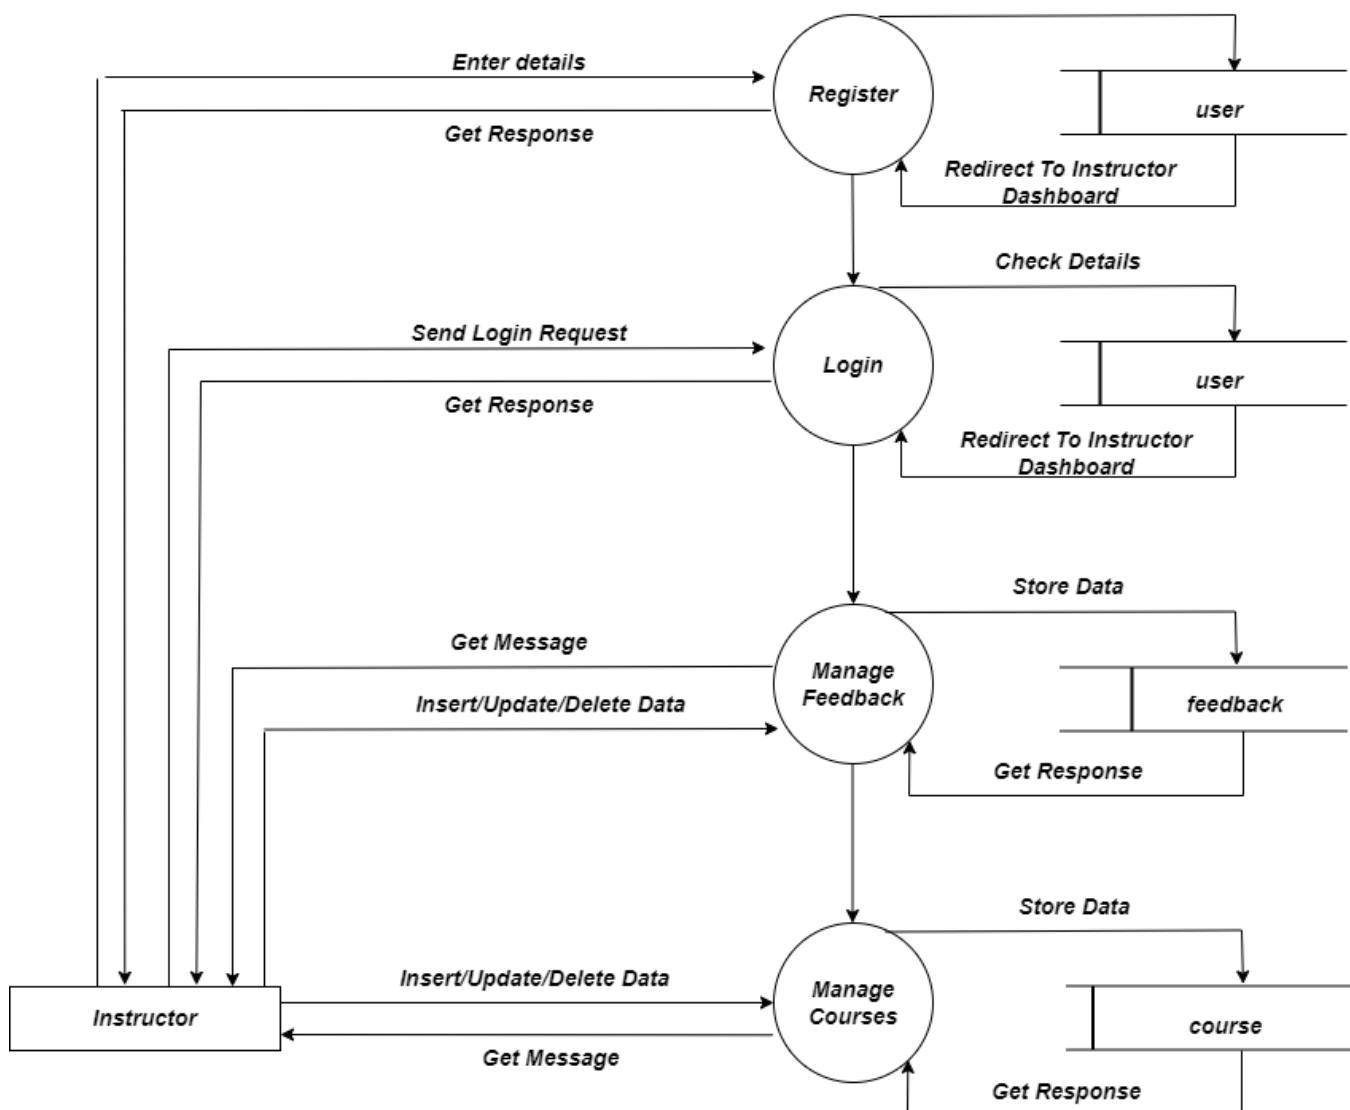

- **1ST LEVEL DFD FOR ADMIN:-**

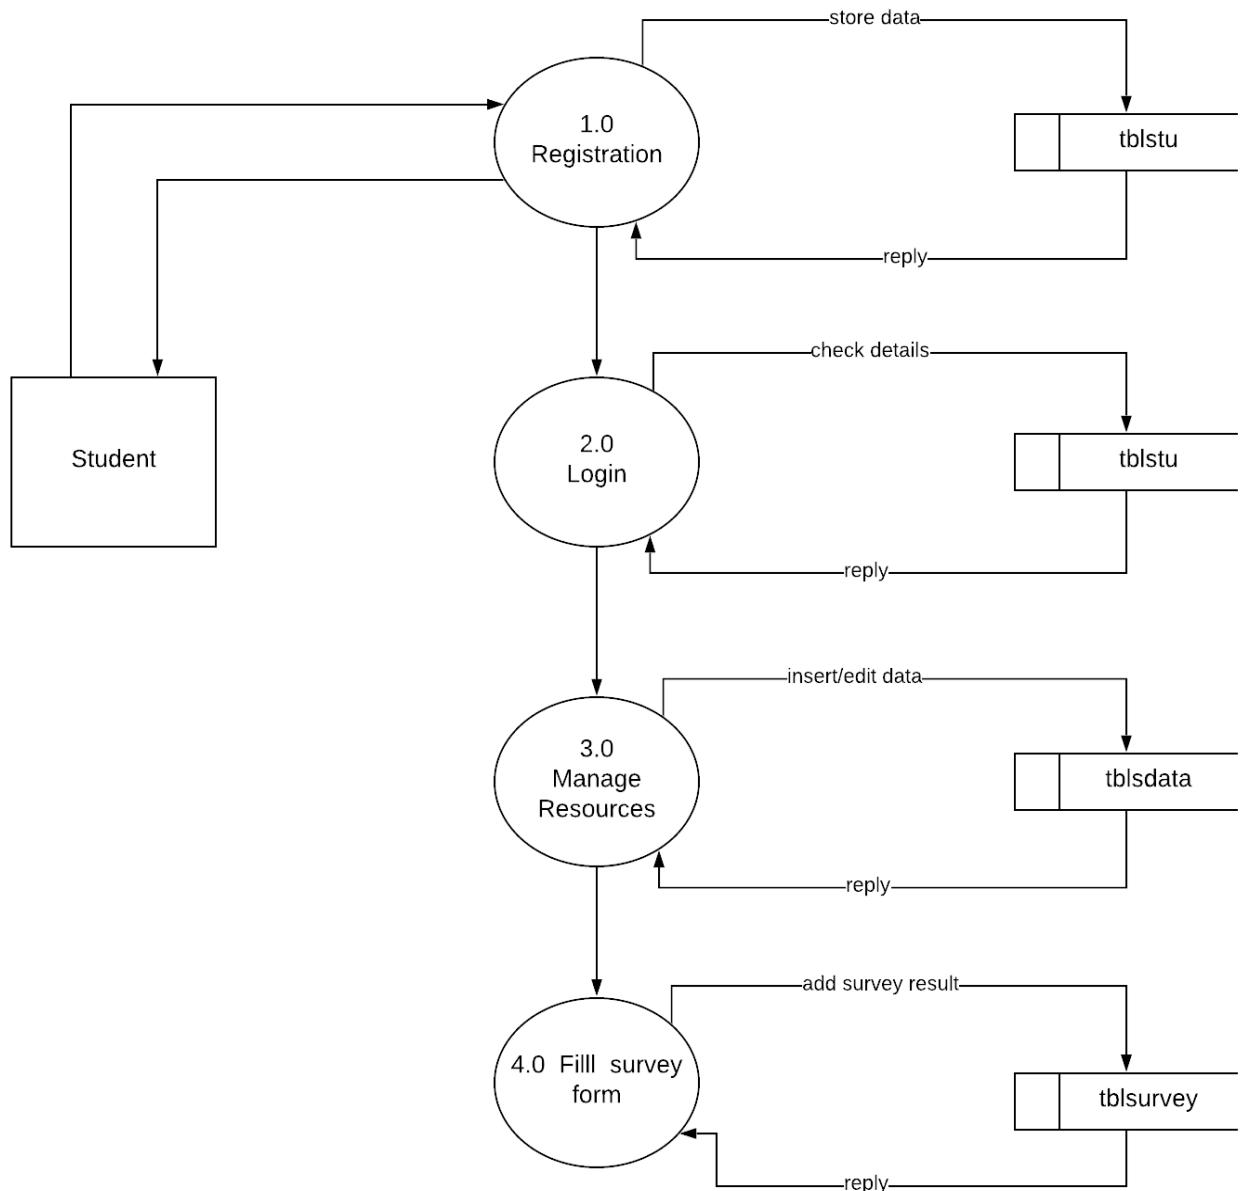

- 1ST LEVEL DFD FOR User:-

- 1ST LEVEL DFD FOR Instructor:-

- **1st LEVEL DFD FOR Student: -**

3.3 Process Specification

1. User module:

Process 1.1: Log in

The user and instructor can login into the System by using unique email and password from general login form general Login Form.

Process 1.2: Registration

If there is new user they can register their data.

Process 1.3: Operations

Members can change their data it means update option is also available Teacher can view their student list If any One forgot their password they can update their password with unique providing by system.

2. Admin module:

Process 2.1: Log in

The Admin can login into the System by using unique email and password from general login form general Login Form.

Process 2.2: Registration

If there is new user they can register their data.

Process 2.3: Operations

Members can change their data it means update option is also available.

If anyone forgot their password they can update their password with email providing by system.

3. Admin module:

Process 2.1: Log in

The Instructor can login into the System by using unique email and password from general login form general Login Form.

Process 2.3: Operations

Instructor can add course which is also available.

3.4 Data Dictionary

- **Users Table**

Name:	Users details
Alias:	Users
Where used/How used:	Data use for particular login For users
Content Description:	id+ email+ password

- **Instructor Table**

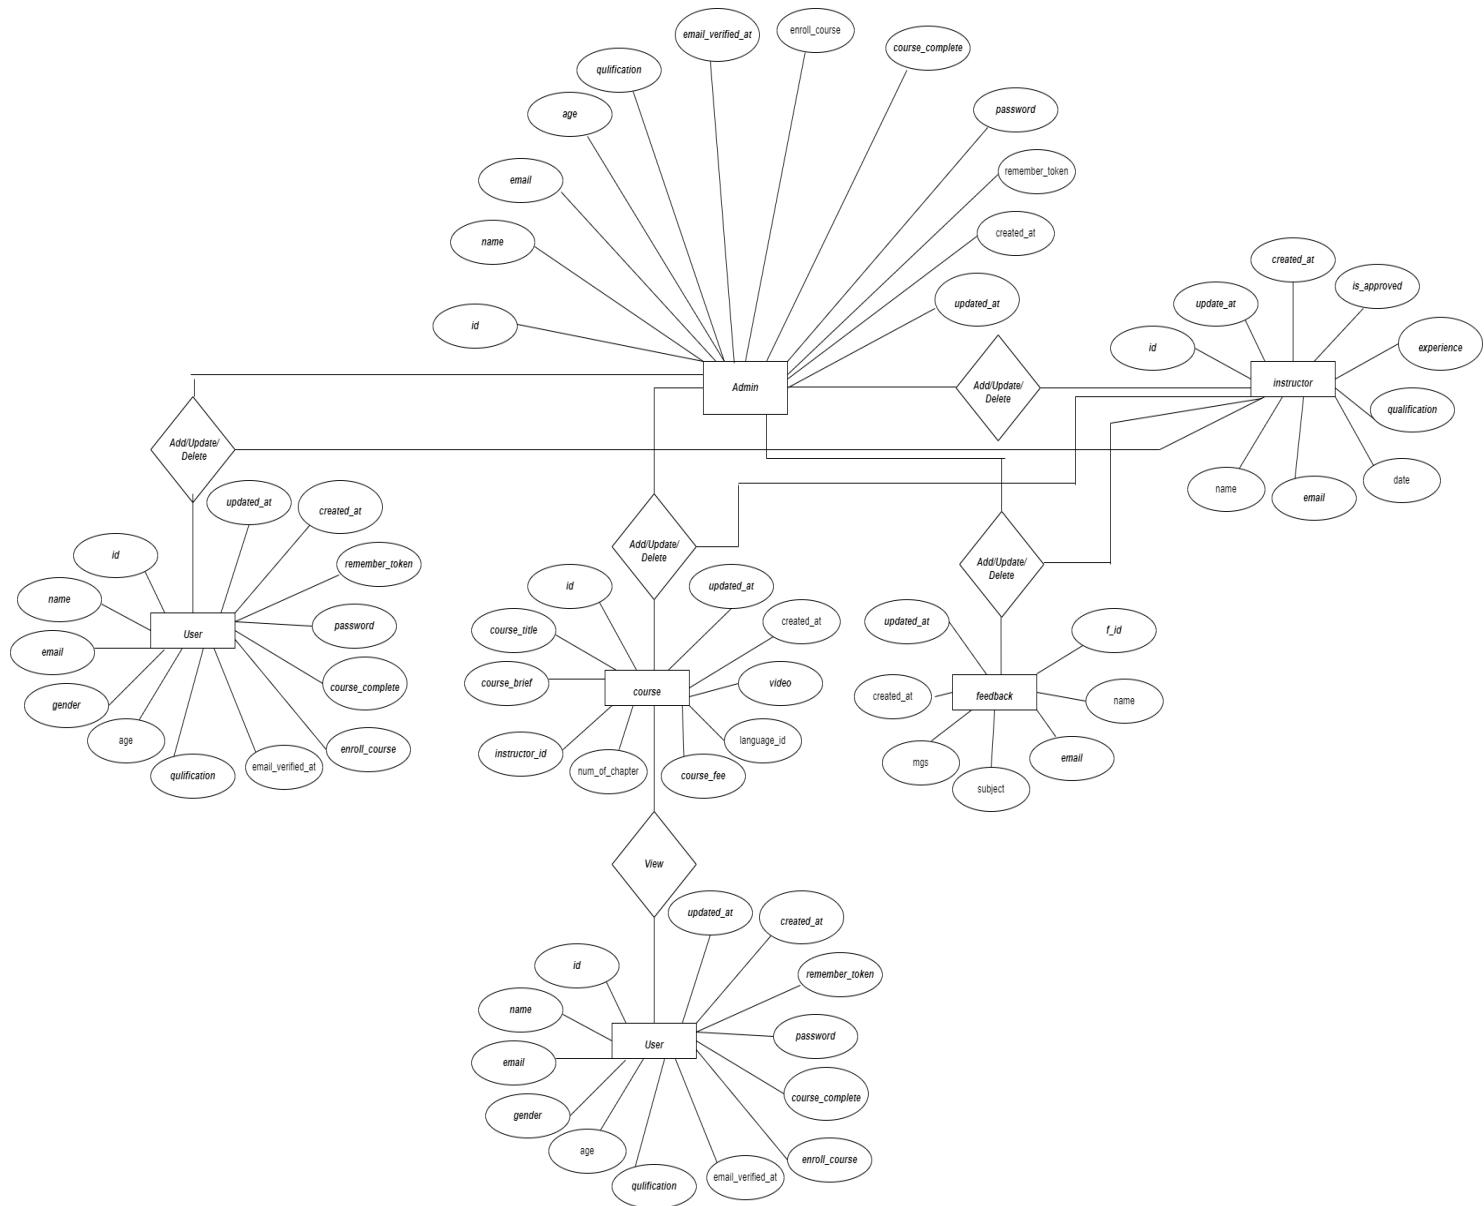

Name:	Instructor details
Alias:	Instructor
Where used/How used:	Instructor details use for selection of instructor of resources
Content Description:	id+ name+ email + date+ qualification+ experience+ is_approved

- **Course Table**

Name:	Resources data details
Alias:	Course
Where used/How used:	Course details are used for insert or/and retrieve data of resources.
Content Description:	id+course_title+course_brief +num_of_chapters +course_fee+video+language_id +instructor_id

4. Design

4.1 E-R Diagram :

4.2 Database design:

- Table Name : **users**

Field Name	Data Type	Constraints	Field Size	Description
id	Auto Number	Primary Key		Contains ID of staff
name	varchar			Contains username
email	varchar			Contains email id of user
gender	varchar			Contains gender of user
Age	Int			Contains age of User
Qualification	Varchar			Contains qualification of User
email_verified_at	Int			Contains email verified of User
enroll_course	Int			Contains enroll course of User
course_complete	Int			Contains completed course of User
password	Varchar			Contains password of User
remember_token	varchar			Contains token of User
created_at	timestamp			Inserted data of user

updated_at	timestamp			Updated data of user
------------	-----------	--	--	----------------------

○ Table Name : roles

Field Name	Data Type	Constraints	Field Size	Description
id	Auto Number	Primary Key		Contains ID of role
name	varchar			Contains name of role
guard_name	varchar			Contain guard name of role
created_at	timestamp			Created data of Role
updated_at	timestamp			Updated data of Role

○ Table Name : permissions

Field Name	Data Type	Constraints	Field Size	Description
id	Auto Number	Primary Key		Contains ID of permissions
name	Varchar			Contains name of permissions
guard_name	Varchar			Contains guard name of permissions
created_at	timestamp			Created data of Permissions
updated_at	timestamp			Updated data of Permissions

o Table Name :
model_has_roles

Field Name	Data Type	Constraints	Field Size	Description
role_id	Auto Number	Primary Key		Contains ID
model_type	Varchar			Contains the model type
model_id	Bigint			Contains model id

o Table Name : **Instructor**

Field Name	Data Type	Constraints	Field Size	Description
id	Auto Number	Primary Key		Contains ID of instructor
name	Short Text			Contains name of instructor
email	Short Text			Contains email of instructor
Date	Short Text			Contains Date of instructor
qualification	Hyperlink			Contains qualification of instructor
experience	Short Text			Contains experience of instructor
is_approved	Short Text			Contains approved of instructor

created_at	Short Text			Created data of instructor
updated_at	Number	Foreign Key		Updated data of Instructor

o Table Name : feedback

Field Name	Data Type	Constraints	Field Size	Description
id	Auto Number	Primary Key		Contains ID of feedback
name	varchar			Contains name
email	varchar			Contains mail id
subject	varchar			Contains subject of feedback
message	varchar			Contains feedback

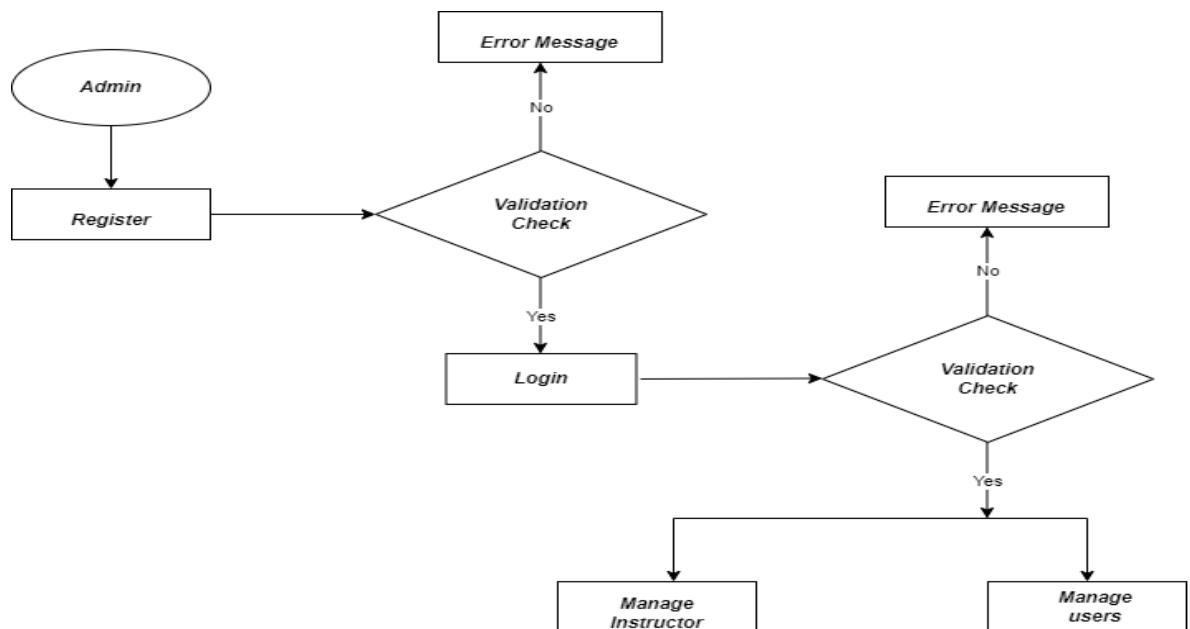

o Table Name : Course

Field Name	Data Type	Constraints	Field Size	Description
id	Auto Number	Primary Key		Contains ID of course
course_title	varchar			Contains title of course
course_brief	varchar			Contains brief of course

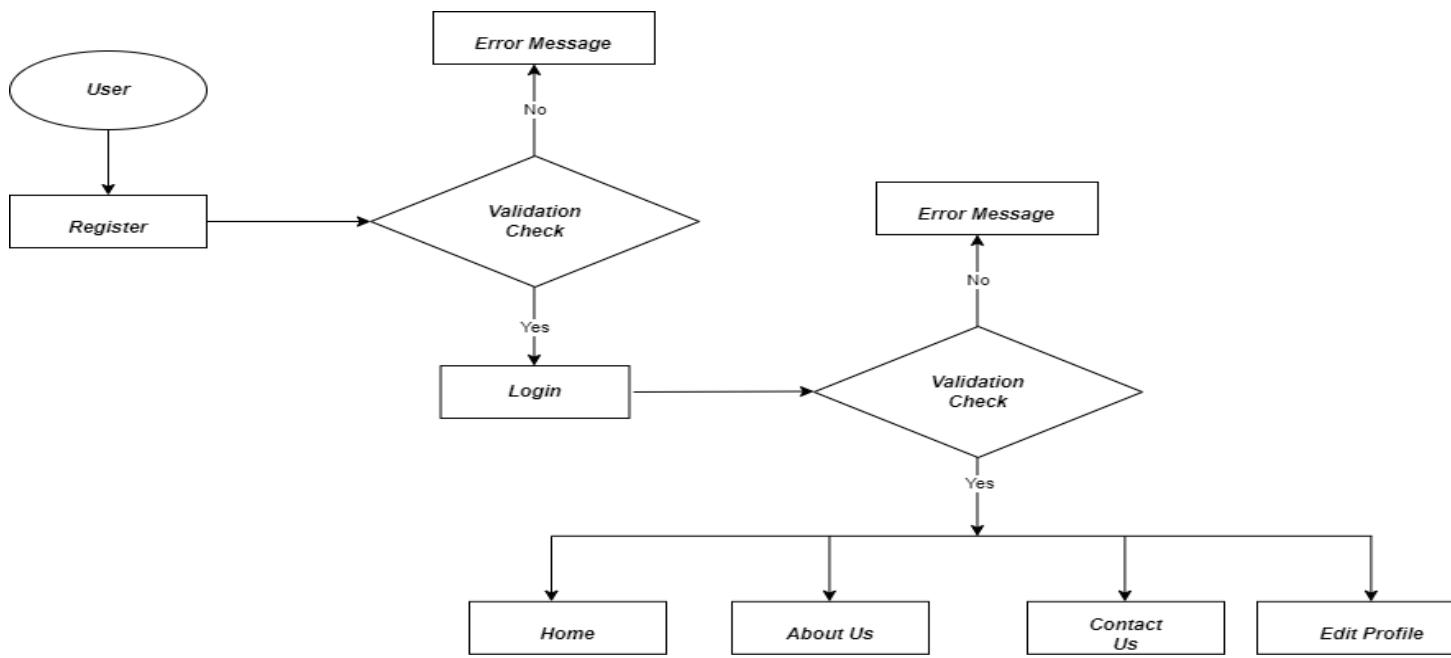

instructor_id	varchar			Contains instructor ID of course
num_of_chapters	varchar			Contains number of chapters of course
course_fee	Int			Contains course fee of course
language_id	bigint	Foreign key		Contains language ID of course
video	longblob			Contains video of course
created_at	timestamp			Created data of Course
updated_at	timestamp			Updated data of Course

4.3 System Flowchart :

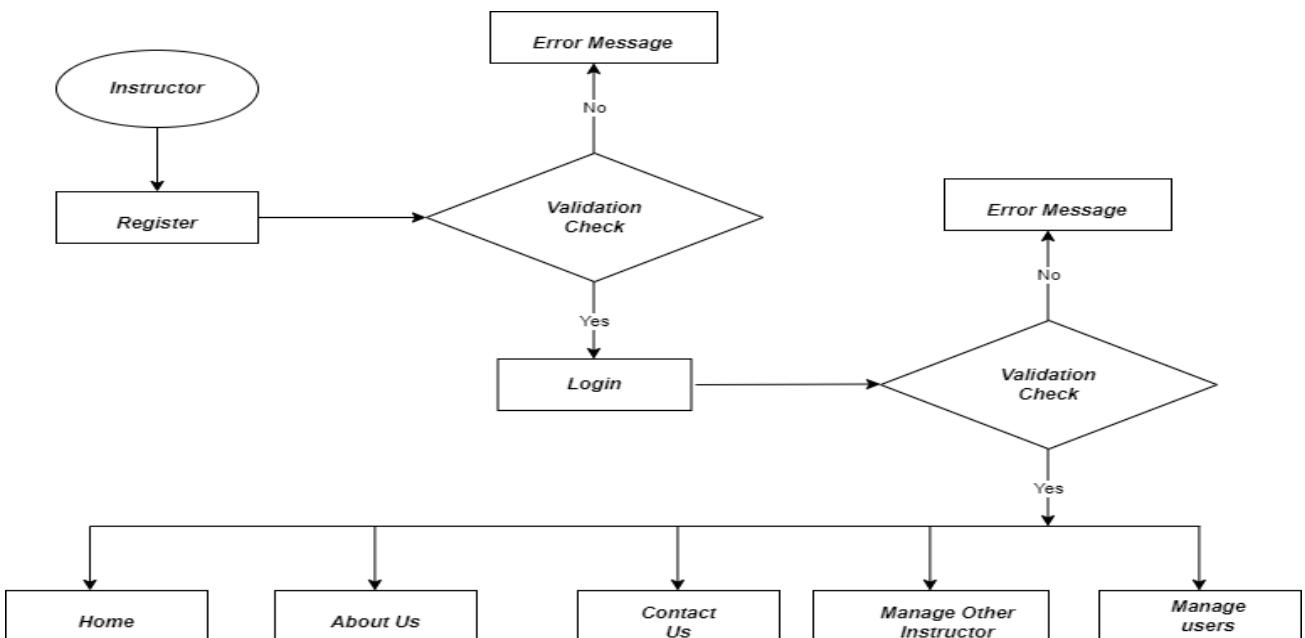

4.3.1 Admin Side :

4.3.2 User Side :

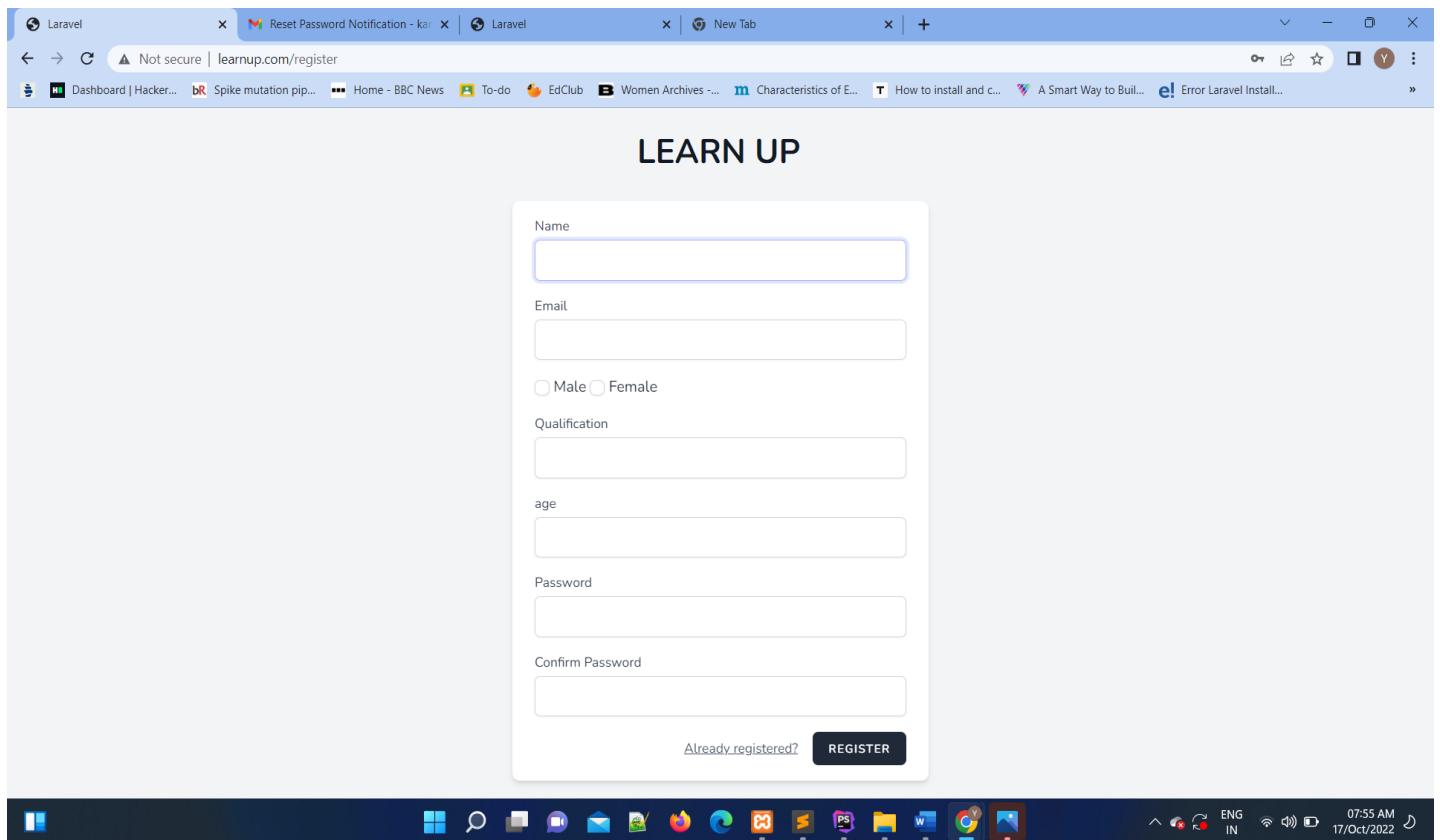

4.3.3 Instructor Side :

4.4 FORM AND REPORT DESIGN(SCREENSOT) LAYOUT:

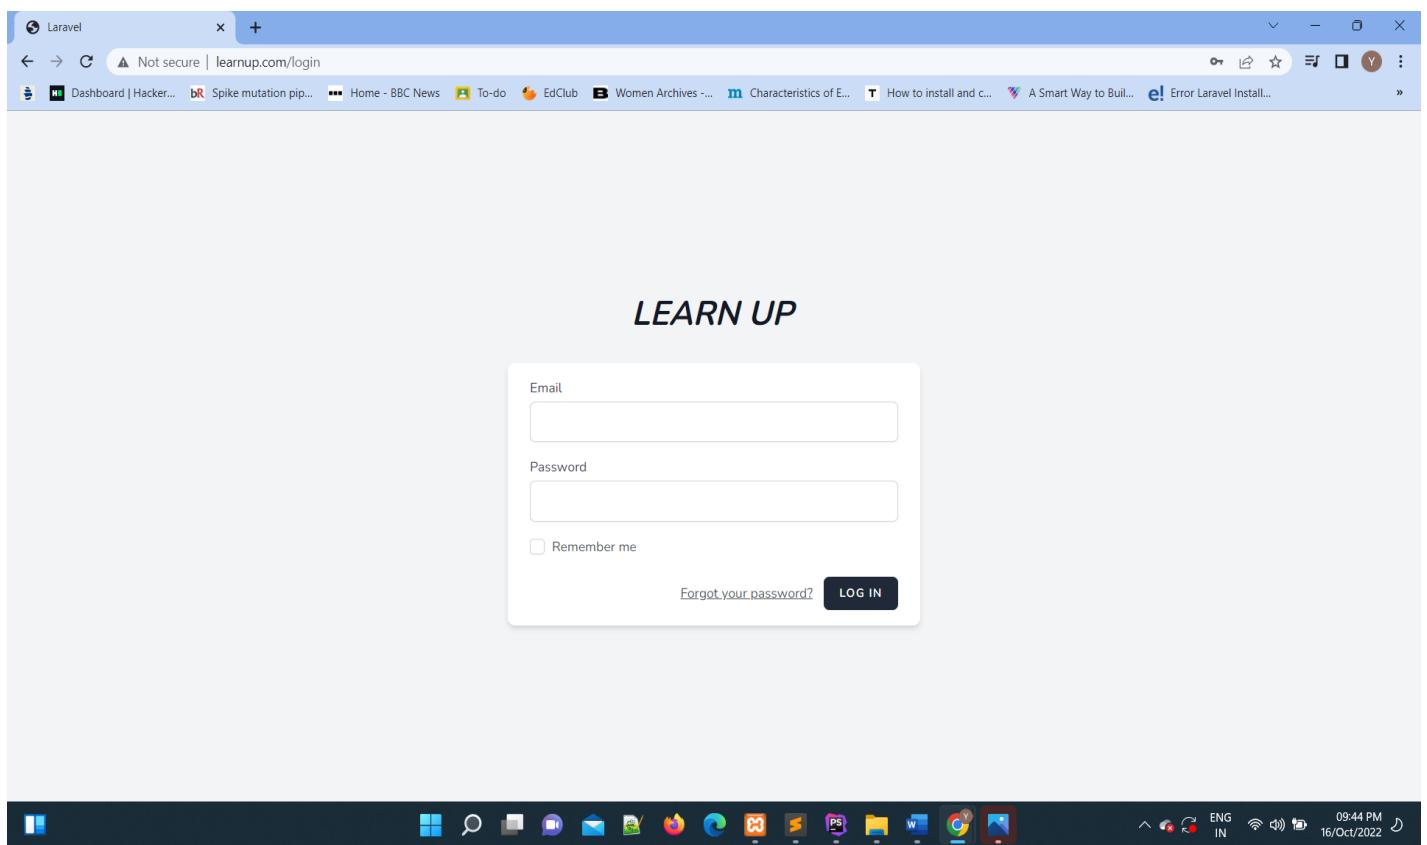

- **Registration Page**

- Registration page to login in e-learning system.

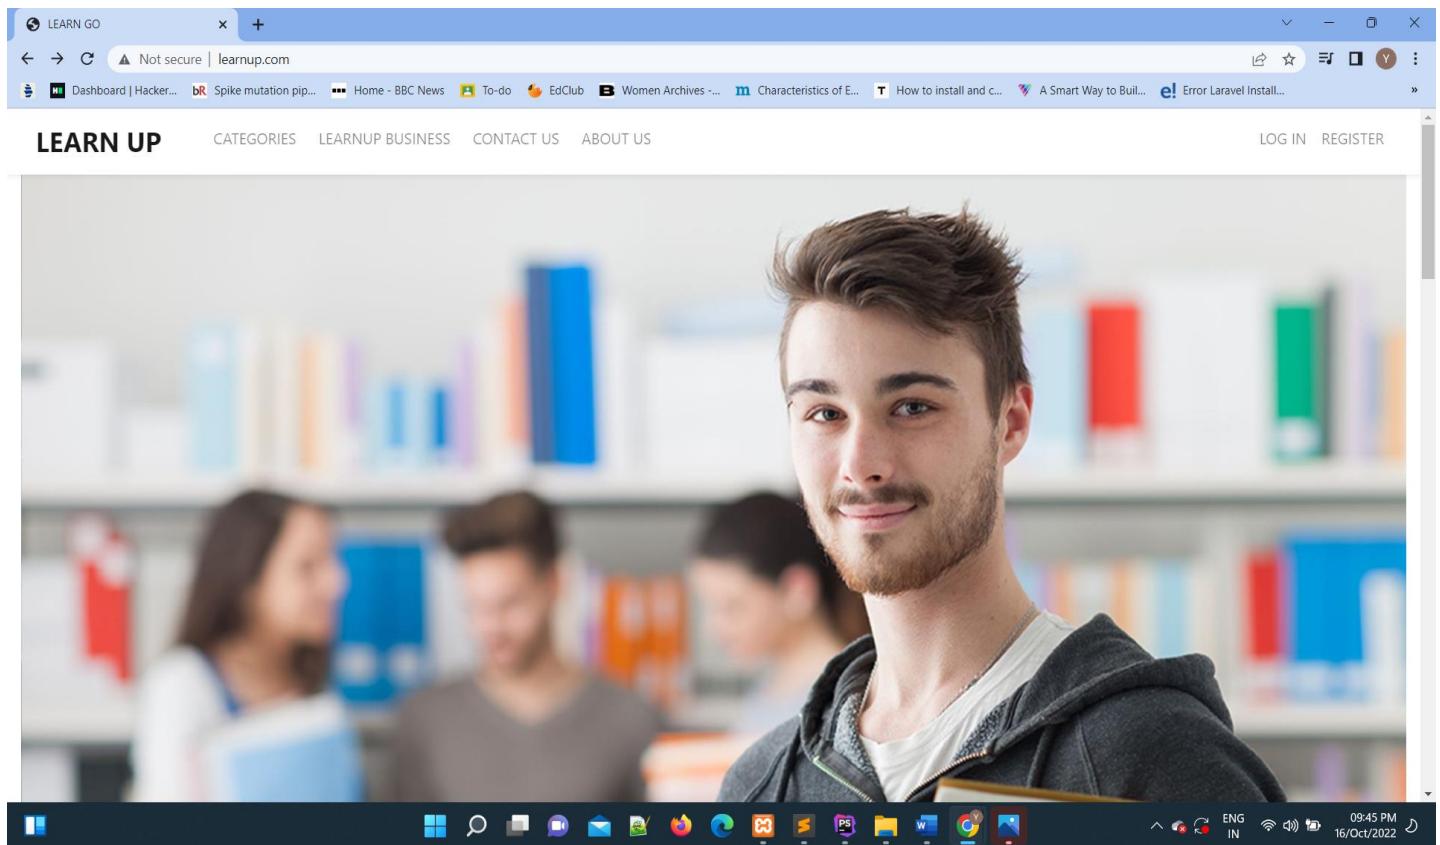

- **Login Page For User And Admin**

- Login page used by admin and instructor member to login in e-learning system.
- Login done with email and password of admin And instructor member.

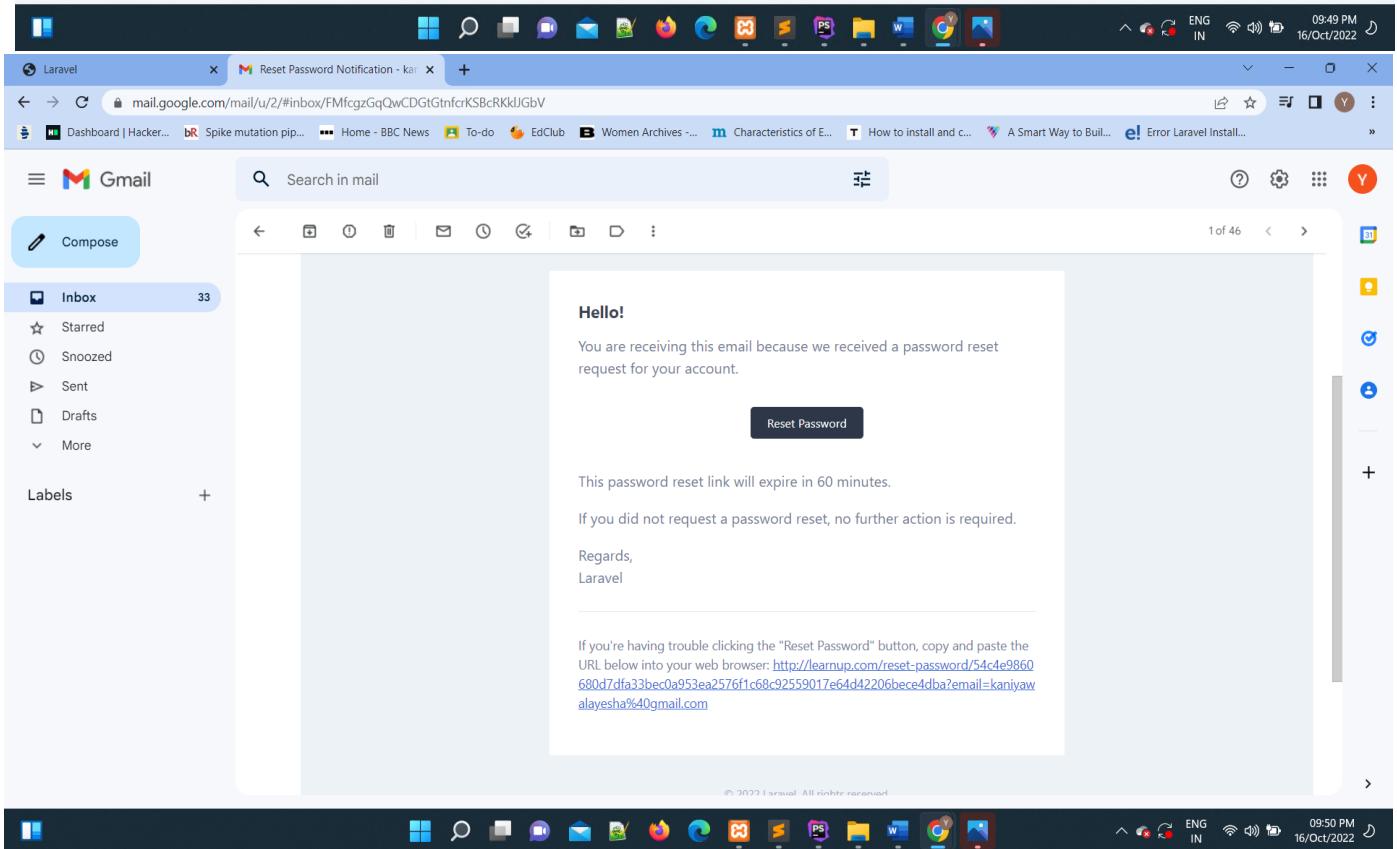

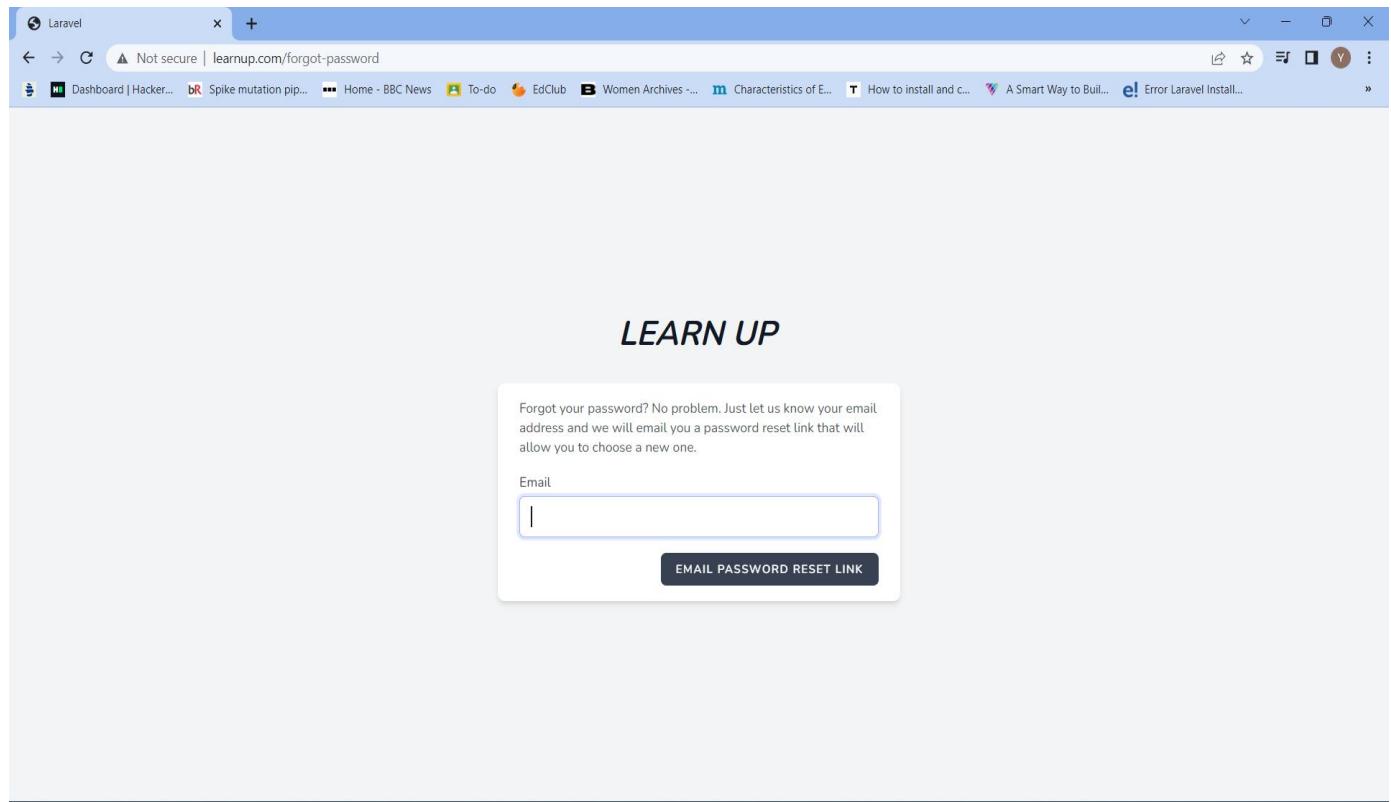

Admin Home Page

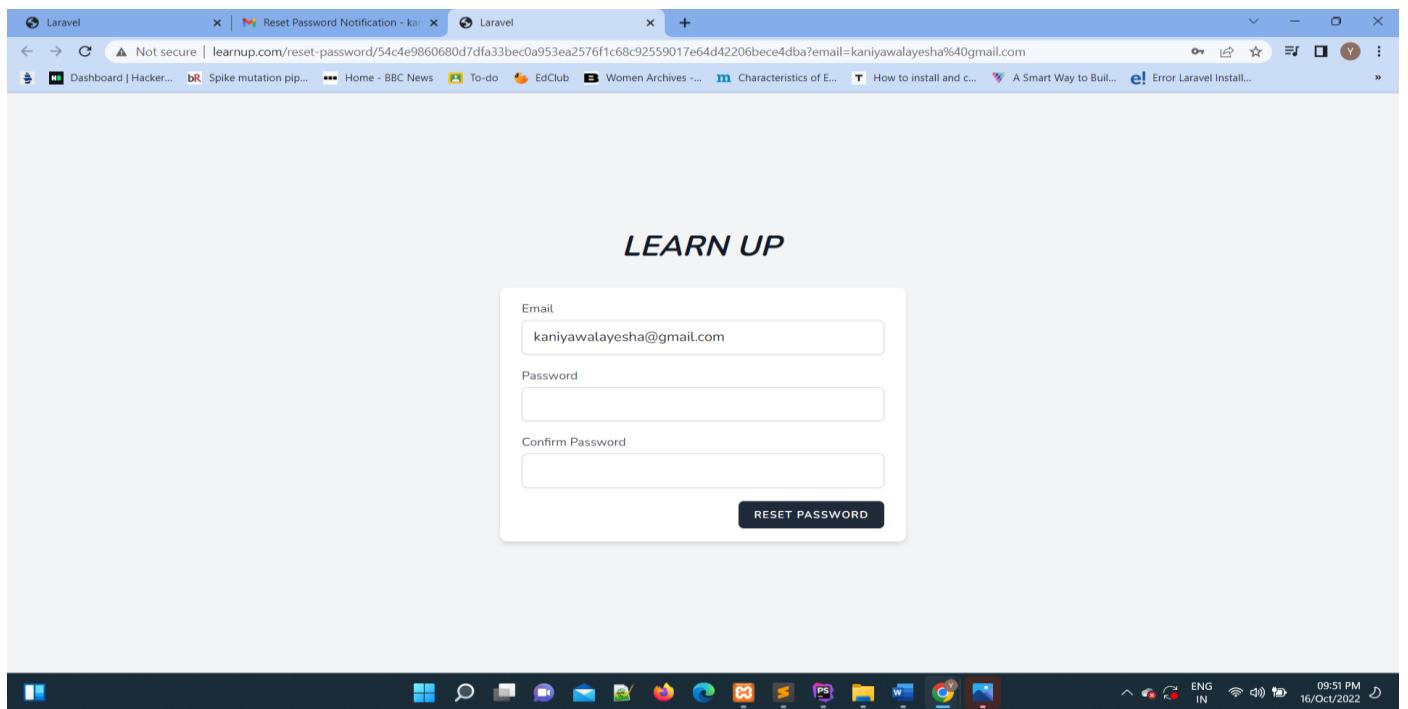

- If admin is login in this system then admin redirected on home page of admin.
- In this home page the name of user who logins is show with welcome message.

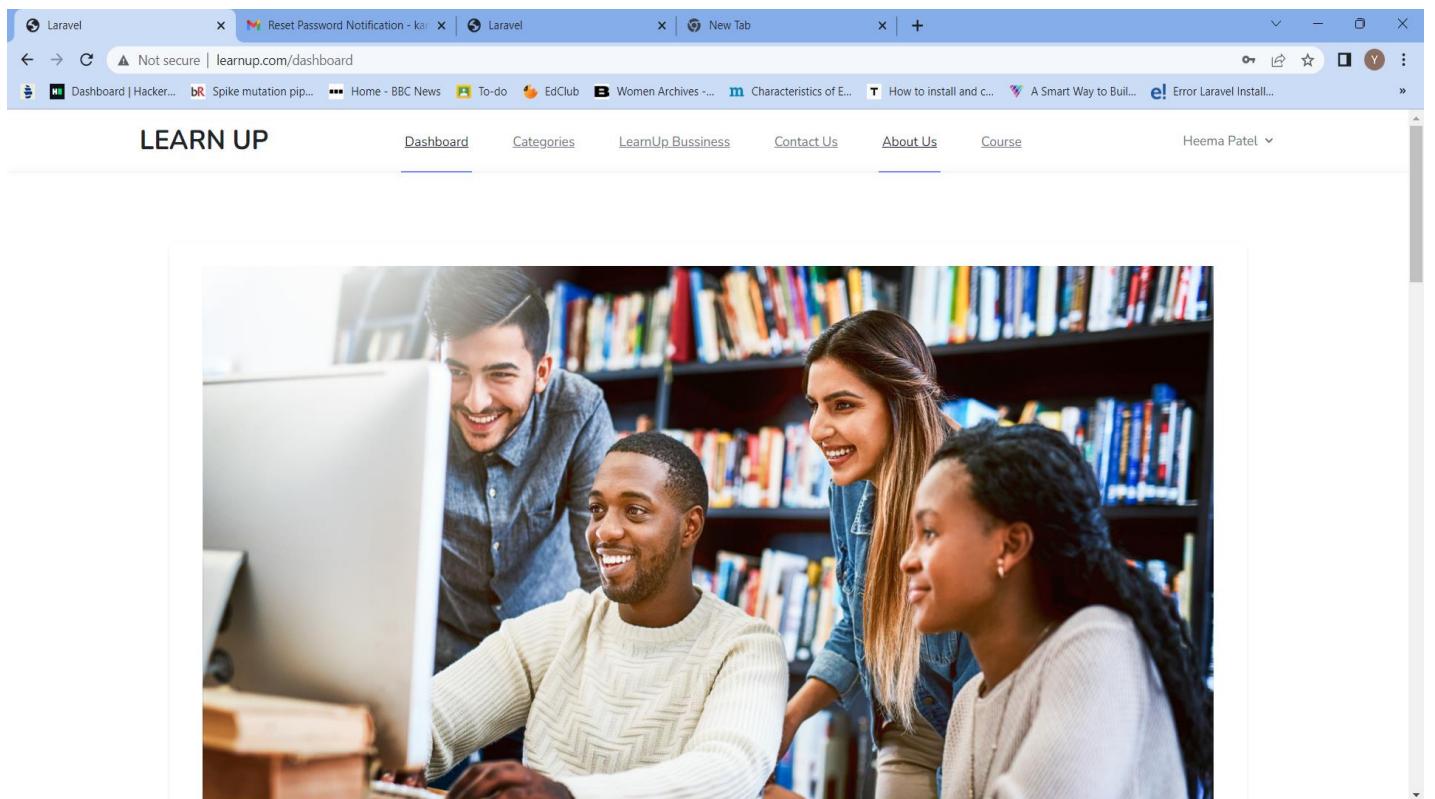

• Forget Password Page

- If any user forget their password then they use the email id and get Password on the mail.

- **Home Page after login**

Course	Price	Language	Creator	Rating
WEB DEVELOPER	₹200	ENGLISH, HINDI	MR.DAVE	★★★★★
GRAPHIC DESIGN	₹200	ENGLISH, HINDI	DR.MEHTA	★★★★★

- **Apply for learnup bussiness**

- If user wants to do business they have to first register.

The screenshot shows a web browser window with multiple tabs open. The active tab is titled 'Reset Password Notification - kar...' and shows a Laravel application. The URL is 'learnup.com/instructor/create'. The browser's address bar shows 'Not secure | learnup.com/instructor/create'. The page content is a form titled 'Add Instructor' with the following fields:

- Full Name:
- Email:
- Birth Date:
- Qualification: No file chosen
- Experience:

At the bottom of the form is a blue 'Save' button. The browser's toolbar and status bar are visible at the bottom, showing various icons and the date/time (08:14 AM 17/Oct/2022).

5.CODE

The image shows two screenshots of the PhpStorm IDE interface, each displaying a different PHP file from a Laravel application.

Screenshot 1 (Top): User.php

```
<?php

namespace App\Models;

// use Illuminate\Contracts\Auth\MustVerifyEmail;
use Illuminate\Database\Eloquent\Factories\HasFactory;
use Illuminate\Foundation\Auth\User as Authenticatable;
use Illuminate\Notifications\Notifiable;
use Laravel\Sanctum\HasApiTokens;
use Spatie\Permission\Traits\HasRoles;

class User extends Authenticatable
{
    use HasApiTokens, HasFactory, Notifiable, HasRoles;

    /**
     * The attributes that are mass assignable.
     *
     * @var array<int, string>
     */
    protected $fillable = ['name', 'email', 'gender', 'qualification', 'age', 'enroll_course', 'course_complete', 'password'];

    /**
     * The attributes that should be hidden for serialization.
     *
     * @var array<int, string>
     */
    protected $hidden = [
        'password',
        'remember_token',
    ];
}
```

Screenshot 2 (Bottom): RegisteredUserController.php

```
<?php

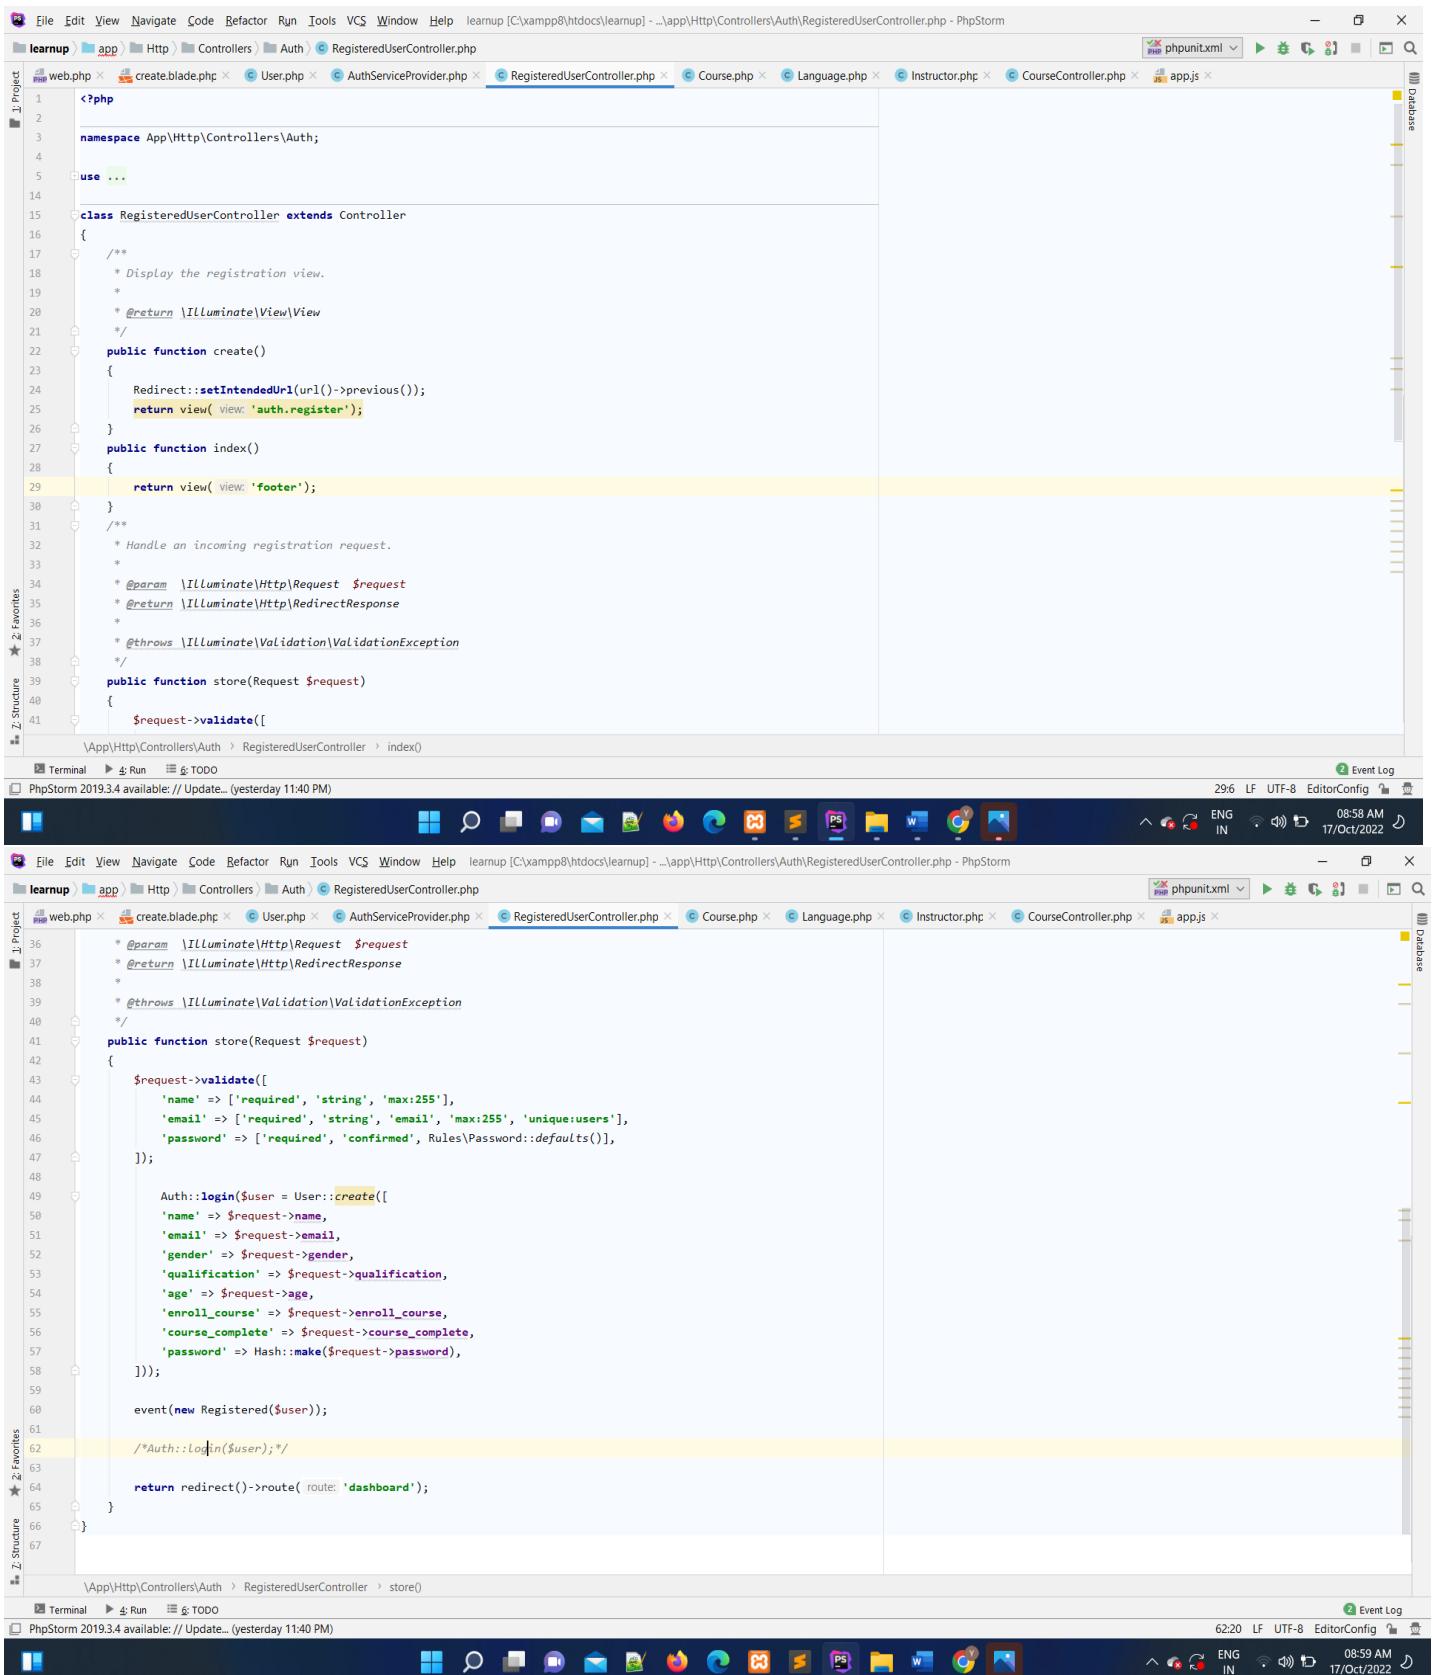

namespace App\Http\Controllers\Auth;

use ...

class RegisteredUserController extends Controller
{
    /**
     * Display the registration view.
     *
     * @return \Illuminate\View\View
     */
    public function create()
    {
        Redirect::setIntendedUrl(url()>previous());
        return view('auth.register');
    }

    public function index()
    {
        /*$users = User::role('admin')>get();
        print_r($users->toArray()); die();*/
        return view('auth.footer');
    }

    /**
     * Handle an incoming registration request.
     *
     * @param \Illuminate\Http\Request $request
     * @return \Illuminate\Http\RedirectResponse
     *
     * @throws \Illuminate\Validation\ValidationException
     */
    public function store(Request $request)
```

```

1 <?php

```

App\Http\Controllers\Auth > AuthenticatedSessionController > create()

The image shows two side-by-side screenshots of the PhpStorm IDE interface, both displaying the same file: UserController.php. The file is part of a Laravel application, as indicated by the code structure and imports.

Top Screenshot (Left):

- Code View:** Shows the index() and create() methods. The index method returns a view named 'layouts.navigation' with a compact variable named 'user'. The create method is currently empty.
- Project Structure:** On the left, a tree view shows the project structure with 'create.blade.php' and 'UserController.php' selected.
- Toolbars and Status:** Includes standard IDE toolbars and a status bar at the bottom showing 'File Edit View Navigate Code Refactor Run Tools VCS Window Help learnup [C:\xampp8\htdocs\learnup] - ...app\Http\Controllers\UserController.php - PhpStorm'.

Bottom Screenshot (Right):

- Code View:** Shows the edit(), update(), and destroy() methods. The update method is annotated with @param Request \$request and @param int \$id. It retrieves a user by ID, updates their name, email, gender, and qualification, and then saves the changes, returning a success message.
- Project Structure:** On the left, a tree view shows the project structure with 'create.blade.php' and 'UserController.php' selected.
- Toolbars and Status:** Includes standard IDE toolbars and a status bar at the bottom showing 'File Edit View Navigate Code Refactor Run Tools VCS Window Help learnup [C:\xampp8\htdocs\learnup] - ...app\Http\Controllers\UserController.php - PhpStorm'.

The image shows two side-by-side screenshots of the PhpStorm IDE interface, illustrating the development of two PHP controllers for a Laravel application.

Top Screenshot (InstructorController.php):

- File Path:** learnup\app\Http\Controllers\InstructorController.php
- Code Snippet:**

```

111     * @param \Illuminate\Http\Request $request
112     * @param int $id
113     * @return \Illuminate\Http\Response
114     */
115    public function update(Request $request, $id)
116    {
117        //
118    }
119    public function sendNotification($id)
120    {
121        // $instructor = User::all();
122        $instructor = Instructor::find($id);
123        $instructor->update(['is_approved' => 1]);
124
125        /**
126         * ...
127         * return Redirect::route('instructor.index');
128         // $instructor = $this->Instructor->find($id);
129     }
130
131    public function delete($id){...}
132
133    /**
134     * Remove the specified resource from storage.
135     *
136     * @param int $id
137     * @return \Illuminate\Http\Response
138     */
139    public function destroy($id)
140    {
141        //
142    }
143
144}

```
- Toolbars and Status:** The top bar shows the file path and the PhpStorm logo. The bottom bar shows the terminal, run, and TODO tabs, along with the status "PhpStorm 2019.3.4 available: // Update... (yesterday 11:40 PM)".

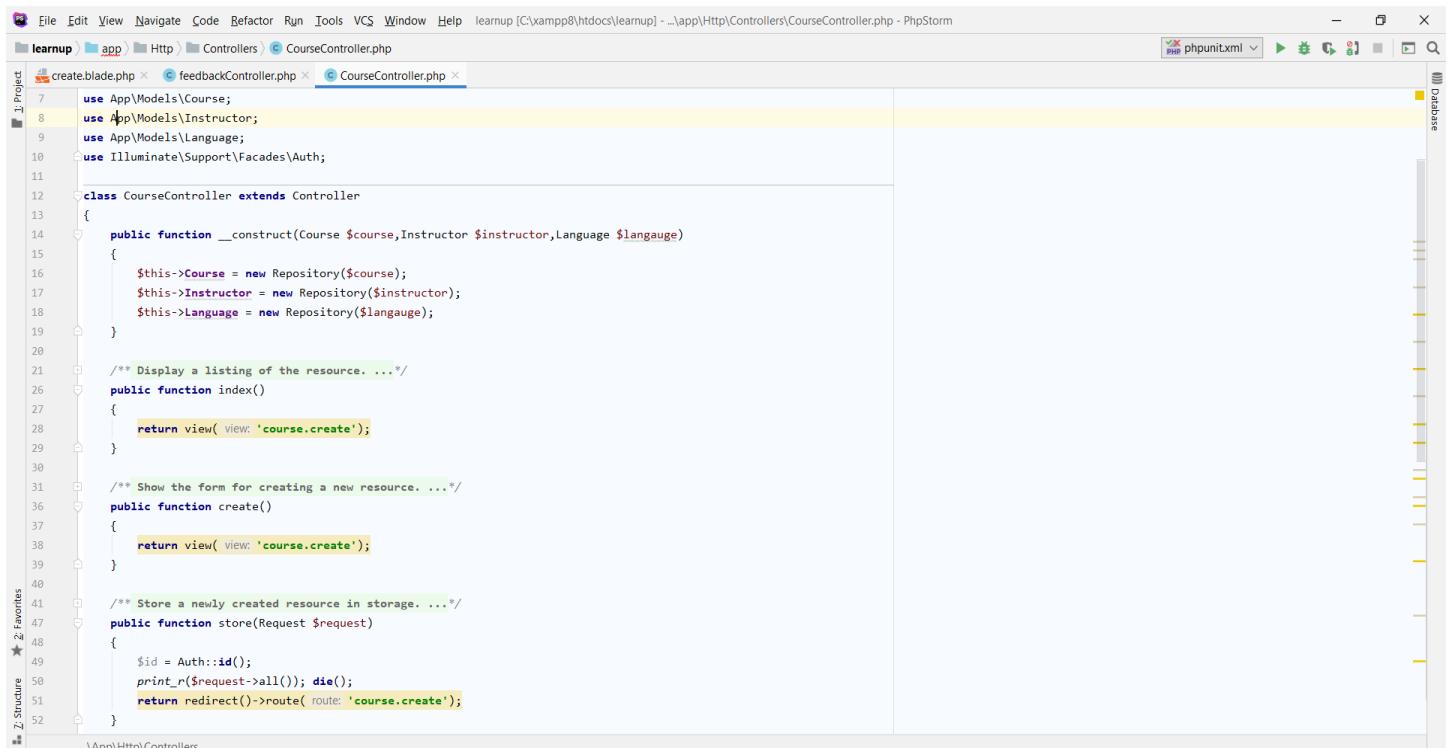

Bottom Screenshot (feedbackController.php):

- File Path:** learnup\app\Http\Controllers\feedbackController.php
- Code Snippet:**

```

1 <?php
2
3 namespace App\Http\Controllers;
4
5 use ...
6
7 class feedbackController extends Controller
8 {
9     public function __construct(feedback $feedback)
10    {
11        $this->feedback = new Repository($feedback);
12    }
13
14    /**
15     * Display a listing of the resource. ...
16     */
17    public function index()
18    {
19        return view('contactus');
20    }
21
22    /**
23     * Show the form for creating a new resource. ...
24     */
25    public function create(){...}
26
27    /**
28     * Store a newly created resource in storage. ...
29     */
30    public function store(Request $request)
31    {
32
33        feedback::create($request->all());
34        return Redirect::back()->with('success', 'Feedback submitted successfully.');
35    }
36
37    /**
38     * Display the specified resource. ...
39     */
40    public function show($id){...}
41
42}

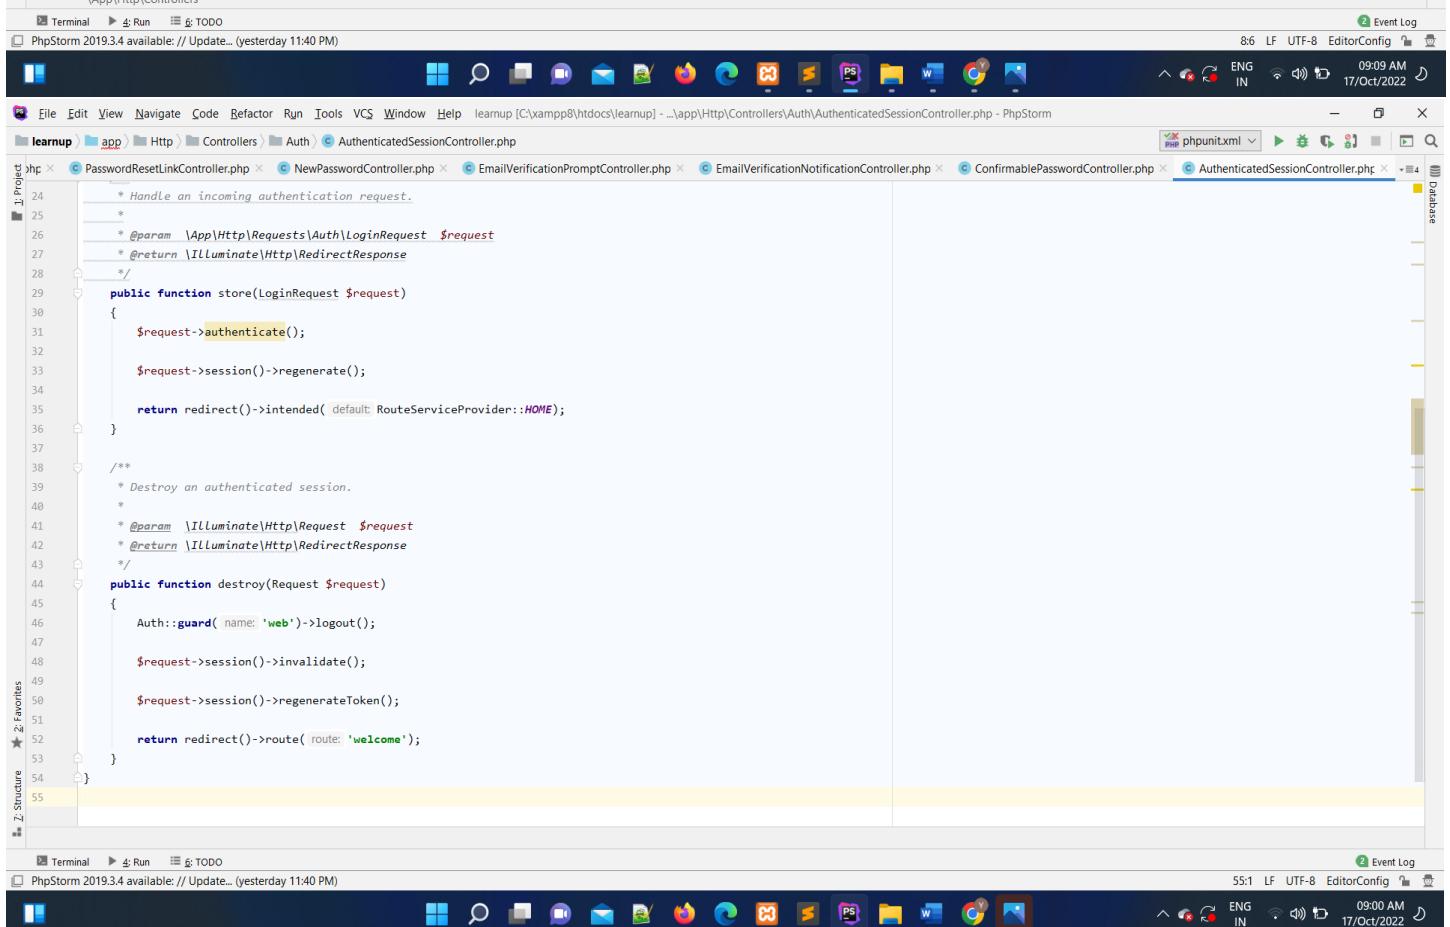

```
- Toolbars and Status:** The top bar shows the file path and the PhpStorm logo. The bottom bar shows the terminal, run, and TODO tabs, along with the status "PhpStorm 2019.3.4 available: // Update... (yesterday 11:40 PM)".

```

The image shows two side-by-side screenshots of the PhpStorm IDE interface. Both screenshots display code within the 'welcome.blade.php' and 'dashboard.blade.php' files. The code is written in Blade PHP, utilizing the `<x-app-layout>` and `<x-slot name="header">` directives. The 'welcome.blade.php' file includes a `h2` header and a `script` block. The 'dashboard.blade.php' file is more complex, featuring a header section with session handling for success messages, a main content area, and a footer with meta tags and links. The IDE's interface includes a top navigation bar with 'File', 'Edit', 'View', 'Navigate', 'Code', 'Refactor', 'Run', 'Tools', 'VCS', 'Window', and 'Help' menus. Below the navigation bar are toolbars for 'Terminal', 'Run', 'TODO', and 'Event Log'. The main workspace shows the code with line numbers and syntax highlighting. On the right side, there are vertical toolbars for 'Database' and 'Database' (repeated). The bottom of the interface features a taskbar with various application icons.

6. Testing

† Login Page:

NO.	Input	Description	Expected Output	Actual Output	Result
1	Empty Email	Blank	Error	Error	Login Fail
2	Empty /Wrong password	Blank/Wrong	Error	Error	Login Fail

† 9Upload Resources:

NO.	Input	Description	Expected Output	Actual Output	Result
1	Empty Name	blank	Error	Error	Not add
2	Empty email	Blank	Error	Error	Not add
3	Empty Gender	Blank	Error	Error	Not add
4	Empty Age	Blank	Error	Error	Not add
5	Empty Qualification	Blank	Error	Error	Not add

† Add Course:

NO.	Input	Description	Expected Output	Actual Output	Result
1	Empty Title	blank	Error	Error	Not add
2	Empty Course Brief	Blank	Error	Error	Not add
3	Confirm Course fees	Blank	Error	Error	Not add
4	Confirm Video	Blank	Error	Error	Not add

† Add Course:

NO.	Input	Description	Expected Output	Actual Output	Result
1	Empty Name	blank	Error	Error	Not add

2	Empty email	Blank	Error	Error	Not add
2	Confirm qualification	Blank	Error	Error	Not add
4	Confirm experience	Blank	Error	Error	Not add

7.0 NEW TOOLS/ TECHNOLOGIES LEARNED/ USED:

- Phpstrom:- It is the main development environment in which we willCode.
- Some CSS for page design
- Template field for passing value .
- Phpmyadmin using sql for database.

8.0 SYSTEM LIMITATION/CONSTRAINTS:

- This application can be work when internet and Wi-Fi connection would be Available.
- Confirm status about application can be done when internet and Wi-Fi connection would be available.

9. Future Enhancement & Opportunities

- More efficient design and user experience.
- Apply More efficient constraints .
- Add feature in course page which instructor resources show for user.
- Add payment method.
